Summary

As a part-time full-stack web developer at a startup company, I have gained a year of experience working with various cutting-edge technologies such as ReactJS, NextJS, NodeJS, TailwindCSS, ExpressJS, GraphQL, MeteorJS, MongoDB, and many more. I have worked on several projects, including developing website interface and backend APIs, designing UI components, and integrating third-party APIs. My proficiency in these technologies has allowed me to develop scalable and robust applications while adhering to best practices and industry standards. I am a fast learner, highly motivated, and committed to delivering quality work. I am also a strong collaborator and enjoy working with cross-functional teams to achieve project goals.

Skill Highlights

- Team player
- Fast Learner
- Agnostic Programmer
- Can complete tasks by following given instructions or by thinking outside of the box.
- Communicates well with the team
- Proficient with these technologies:
 - ReactJS
 - NodeJS
 - ExpressJS
 - PHP
 - Web Sockets
 - Javascript
 - Digital Ocean
 - GraphQL
 - MongoDB
 - TailwindCSS
 - NextJS
 - Python
 - Typescript
 - AWS

Experience

Full-stack Web Developer - 10/2022 to 02/2023

Iona Innovation Labs, Philippines

- Developed APIs using both RESTFUL and GraphQL approach. Those APIs are also secured ensuring only valid entities are able to access a specific endpoint.
- Designed and implemented responsive user interfaces.
- Managed database using MongoDB with the use of efficient schema design, ensuring data consistency and retrievability.

Technologies used: ReactJS, ExpressJS, NodeJs, MongoDB, Socket.IO, GraphQL, TalkJs, AWS (S3)

Full-stack Developer – 07/2023 to Present

Raksquad Tech Corporation, Philippines

- Truesight is a web platform that allows users to control everything from transactions to client interactions all in one spot. I led the development team that created it. My other responsibilities were making it as easy to use as possible for customers and creating a mobile app API for photographers that would make uploading pictures a breeze. Additionally, I deployed the web frontend and backend using digital ocean through the use of Digital Ocean's Droplet.
- Actively collaborated with the support team to develop Net Fuel, a robust website for monitoring fuel. Assisted in enhancing the functionality and user experience of the platform to ensure seamless management of critical data points. This contribution was invaluable to the development of the project.

Technologies used: NextJS, ExpressJS, NodeJs, MongoDB, Socket.IO, Digital Ocean

Education

Bachelor of Science: **Information Technology** - 2025

Bulacan State University – Bulacan, Philippines
